

Seaborne oil trade is an opaque industry. Our current, future and historical information lifts the veil on this sector.

With APEX you are able to understand what's happened on the water, monitor what's happening now and predict future shifts in supply and demand, so you can make better oil fleet management and trading decisions with confidence. A subscription allows you to access:

- ▶ **Ultra-reliable seaborne oil trade analysis** broken down by import and export voyages and port-specific accounts of tanker movements
- ▶ **Detailed loading and discharge updates** allowing you to understand vessel utilisation levels and feed your organisation's knowledge of individual refineries
- ▶ The gold standard in vessel movement data you'll get the most accurate view of oil flows thanks to our combination of AIS vessel tracking and human intelligence.

You now have three entry points to our data. Choose from:

- ▶ Full APEX subscription including analysis of import and export volumes from 120+ countries
- **▶** Weekly global storage report
- ▶ Weekly Top 30 countries crude oil export import reports

Subscription Types

Full APEX subscription

- ▶ Weekly updates of global VLCC, suezmax, aframax and panamax shipments (VLCC & Suezmax updates are twice weekly).
- ▶ Customisable data unique desktop data mining tool to filter, analyse and download.*
- ► Tanker deployment and utilisation analysis by size range and trade route.
- **Export and import oil volumes –** by port of load and discharge.
- ▶ **Global trade picture** oil trade analysis by region and country report (including analysis of 120+ countries).
- ▶ Laden tanker movement coverage by port of load and discharge.
- ▶ **Ballast water coverage** by origin, destination, vessel type and charter history.
- ▶ **SUBSCRIPTION INCLUDES THE NEW** weekly APEX Storage Report **AND** weekly APEX Top 30 Countries Reports.

APEX Storage Report

- ► Historical and current short-term and long-term crude and product tanker storage data.
- ► Two years of historical information plus current year allowing you to analyse recent trends.
- ▶ Short term storage by tanker size, number of vessels, total dwt and barrels of oil, and changes on a week to week basis.
- ► Locations of short-term and long-term storage vessels, as well as operator and cargo details.
- ► Comparisons of short-term and long-term storage volumes against the live tanker fleet.

APEX Top 30 Countries Reports

- Top 30 largest crude oil import and export countries by aggregate volume (including Libya due to geopolitical interest)
- For each country, 8 tabs of export and import data, cut by country and/or region origin and destination, broken down into weekly and monthly periods for your own analysis.
- Two years of historical information plus current year allowing you to analyse recent trends.
- Direct email of CSV file, delivered weekly straight to your inbox.
