**Digitalisation**

Digitalisation of the maritime sector may be progressing at a slower rate than in certain other sectors, but new technologies are gradually being integrated. Innovations such as artificial intelligence, the 'internet of things' and 'smart' ports are all on the horizon. However, challenges and concerns remain in regard to regulation, training, liabilities and costs.

**Latest news**

- From the News Desk: Will 2021 be better for shipping?
  
  Shipping was considered among the sectors most at risk from a global economic slowdown.

- Coronavirus crisis seen as expediting digitalisation push
  
  The virus is sure to spur greater interest in adopting digital solutions, according to analysts.

- Best of both worlds as Baltic Exchange expands in Asia
  
  The role of Singapore and its maritime cluster has been highlighted as an innovative model.

- What if coronavirus teaches us to consume less?
  
  In the discussion about cutting emissions by 50%, no one wants to discuss the benefits of consuming less.
There are a few features available to you on an article page. You can email, print, bookmark any articles; you can also share the articles on social media.

For each article, there are Tags at the top and bottom which highlight the main topics covered in the article. You can click on these to view similar content of interest to you.
