Access the new standard in sanctions compliance risk analysis

Intelligent, actionable compliance insight designed to make your life easier
Don’t let complex data slow you down

Trade compliance screening, Know Your Customer (KYC) checks and investigating possible illicit maritime trading activity has never been more complex.

You need to expose, and act on, evidence of vessels displaying deceptive shipping practices and sanction evasions to avoid the consequences of non-compliance with OFAC, EU, OFSI and other regulatory guidelines. But this can be a daunting task involving time-consuming processes such as cross-referencing different data types, making manual assessments and undergoing deeper research.

It’s essential to move quickly and act precisely, but these processes can be complex, time-consuming, and prone to human error.

“We need to continuously monitor our vessels for compliance risk. This is an arduous process.”

Leading Classification Society
Introducing Seasearcher Advanced Risk & Compliance

Access a new view of validated maritime trading risk and context on which to base and evidence compliance decisions.

Seasearcher Advanced Risk & Compliance gives you a level of insight previously unattainable, enabling you to save time and effort completing sanctions compliance checks and validating what turn out to be false positives.

Investigate potential illicit activity such as high-risk port callings (including dark port callings), deviation from normal trade routes, loitering and probable dark ship to ship transfers. Then download all the documentation you need, in one report.

Intelligent insight for...

- Sanctions Compliance Managers
- Credit Managers
- Legal Counsel
- Crime Analysts
- Export Control Officers
- Maritime Lawyers
- Intelligence Officers

Move quickly, with actionable insight to identify risk without delay

Analytics and intelligence that gets you to the compliance insight you need, quickly

Gain a clear understanding of a vessel’s trading pattern in context, with flags for previous illicit activity in time periods defined by you. Avoid unnecessary investigations with contextual intelligence that highlights when an anomaly or AIS gap might result in a compliance risk.

Market First
Dark Port Call Detection
Detect and review predicted high-risk callings at compatible ports even when AIS is disabled

Market First
Dark STS Detection (1-way and 2-way)
Identify and review detailed insight on probable dark STS pairings, even when one or both vessels are not transmitting AIS

Abnormal Movements & Loitering
Detect vessels behaving in an abnormal way, including potential illicit activity such as a 1-way dark STS transfer

Enhanced AIS Gap Detection
Avoid wasting time researching every AIS gap with intelligence that distinguishes between a signal loss and a vessel deliberately disabling its AIS

Trading Insights
View the trading profile of a vessel in context with its risk

Tailored Risk Scores
Avoid unnecessary investigations with instant risk indicators based on the vessel’s profile and detected voyage risks, tailored to a time period defined by you

“False positives is a big issue, time = money. Seasearcher solves this problem for us”
**Leading International Bank**

“Our biggest challenge is data overload and removing the false positives. Seasearcher overcomes both”
**Top 20 global bank**

Managing Escalations

Simpler investigations with one informed view

Quickly fulfil detailed investigations with irregular voyage behaviour all in one event log and confidently present your decisions with tailored reports as evidence

**Comprehensive Voyage Event Logs**
Simplify investigations with a single view of a vessel's voyage, marking all key events such as port calls, draught changes, destination changes, abnormal movements, AIS gaps, high-risk area entries, dark STS and dark port calls or chokepoint passings

**Market First**
**Tailored Compliance Reports**
Evidence your findings with downloadable reports that include all events, risk ratings and voyage maps

**Comprehensive Compliance Filters**
Screen and investigate vessel risk by filters on vessel sanctions, ownership, flag, AIS manipulation, risk rating and voyage risk

“*We need an efficient reporting tool that allows us to download an explanation of detected risk indicators. Seasearcher gives us this*”
*Leading Commodities Producer*

Monitoring Vessels

Tailored visibility of what is going on at sea

Stay alert to new compliance risk – with tailored monitoring lists and compliance risk alerts, never miss illicit activity involving your vessels of interest

**Screened Vessel Lists**
Upload and share screened vessel lists to create company audit trails

**Continuous Monitoring Lists, With Validated Alerts**
Customize your compliance alerts and get alerted to any changes in the risk profile of your vessel or fleet of interest

“*It is important that we’re alerted to probable illicit activity. Seasearcher does this*”
*Top 10 global bank*

Built on the best data and artificial intelligence, to give you the complete view of sanctioned and illicit activity.

Data in
(3,000+ sources)

Our database
Enhancing, completing & verifying

Industry expertise
Delivering analytics that are relevant and insightful

Analytical expertise
Devising methodologies that achieve optimal analytical results

Advanced Algorithms
Designed by experts to rapidly disseminate, match and verify data

Artificial intelligence
Creating advanced context around behaviour, its implications and risks

Seasearcher Advanced Risk & Compliance
Intelligent and automated analytics to make compliance quicker and simpler

How we bring you better data through COACT

Consistency
Our methodologies use strict rules and defined tolerances to manage consistency.

Origin
Our data is built on the most reliable inputs from our own exclusive sources and partners that we trust.

Accuracy
We are constantly monitoring and improving our data sets, removing anomalies, driving accuracy and increasing precision.

Completeness
Our extensive data coverage forms the full picture of maritime trade activities, fleet and vessel operations and the infrastructure of the entire industry.

Timeliness
Automated data processing and validation ensure our data is current and quickly accessible.
